HOLGANIX®

0% FINANCING AVAILABLE FOR THOSE THAT QUALIFY

Soil Stewardship Program: Legacy

A COMPREHENSIVE APPROACH TO SOIL HEALTH AND FARM PROFITABILITY.

Join Holganix's Soil Stewardship Program and revolutionize your farming with a comprehensive approach that not only enhances soil quality but also boosts carbon capture and storage. By focusing on healthier soils, you can achieve better yields, attain significant cost savings through reduced input needs, and unlock an additional source of revenue through carbon sequestration.

BENEFITS

PRODUCT BENEFITS

- Transforming your farm by reintroducing life to your soil
- More extensive root systems for stronger, more resilient crops
- More functional soils and better roots drive improved nutrient uptake, yields, and efficient water utilization

OTHER BENEFITS:

- Gain soil intelligence with the included Holganix testing and data
- Earn carbon sequestration benefits and other environmental incentive funds and credits
- Holganix pays for testing, validation, and sales costs, then splits carbon revenue 60 (farmer) /40 (Holganix)
- 0% interest financing available for those that qualify

PROCESS

1. Fill out our prequalification form
2. Submit field boundaries
3. Get approval and sign the agreement
4. Provide access for Holganix to conduct testing, testing occurs after harvest.
5. Intermediate testing occurs throughout the program
6. Share in the first vintage of carbon credits which will be monetized in early 2026

Legacy Program Requirements

GROWER INFORMATION

- Provide contact information
- Access to farm data, including boundaries and as-applied data
- Allow testing professionals to access enrolled fields for soil testing purposes. Baseline testing will begin following the 2024 harvest and before 2025 spring planting.

FARM & FIELD SIZE

- Commit to a minimum of 500 farmable acres
- Holganix will conduct a digital review of your fields to asses best fit
- Enroll at least 50% of your total farmable acres

APPLICATION COMMITMENTS

- Apply Bio 800^{+} in fall and spring. Products must be purchased at the same time to qualify
- Commit to 3 years of applications
- Growers receive a 3-year price lock on product cost from September 15, 2024 to September 15, 2027
- Commit to sustainable practice management for 10 years

SUSTAINABLE PRACTICE MANAGEMENT

- Nutrient Management: Collaborate with Holganix to reduce overall macronutrient (NPK) application, with a focus on reducing nitrogen application on corn crops.
- Nitrogen Stabilizers: Avoid the use of nitrogen stabilizers that block microbial activity, such as urease or nitrification inhibitors, as they work against soil biology.
- Tillage Practices: Adoption of minimal or no-till farming practices, prohibiting conventional tillage.

FINANCING OPTIONS

- Holganix provides 0% interest financing on Bio 800^{+} applications available for farmers that qualify

DISTRIBUTION OF FUNDS AFTER CARBON SALE AFTER YEAR 1

- A percentage of funds remains in a buffer pool to account for any carbon lost after the credit has been created. Each project farm will undergo a risk assessment to determine contribution.
- First money earned covers product cost or is provided back to the grower if financing wasn't utilized
- Next distribution is allocated towards Holganix to cover the cost of testing ($15-$25 per acre)
- The remaining monies are distributed as a 60/40 split between the grower and Holganix once monitized

0% Financing Application

Scan the QR Code to take advantage of our 0% financing. Available for growers that qualify until January 1, 2026.
