

EMPOWERING SOILS WITH *Holganix Agriculture*

Holganix Bio 800+ Agriculture harnesses the power of over 800 species of soil microbes to:

- ↑ Increased Yield
- ↑ Provide a 3-5X ROI on Corn & Soy
- ↑ Promote Soil Health
- ↑ Enhance Plant Resilience From Weather & Disease

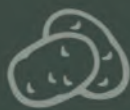

COMMERCIAL AND UNIVERSITY TRIAL RESULTS

CORN RESULTS

7-11+ bushel per acre yield increase, providing a 3-8x ROI.

POTATO RESULTS

\$200 per acre yield increase, providing a 10-20x ROI.

SOY RESULTS

3-5+ bushel per acre yield increase, providing a 3-5X ROI.

NEMATODE RESULTS

80% reduction, broad spectrum with multiple modes of action.

Corn Growth Data

HOLGANIX AGRICULTURE TESTIMONIAL

Illinois-based researchers site a 9 bushel per acre yield increase with Holganix Agriculture compared to the control. That is a 4x ROI!

The researchers simply applied Holganix Agriculture infurrow at a 0.5 gallon per acre rate.

HOW DOES HOLGANIX AGRICULTURE WORK?

1

Microbes, including Plant Growth-Promoting Bacteria and Mycorrhizae, stimulate early root development.

2

Microbes capture, convert and release nutrients to the plant.

3

Microbes promote the plant's tolerance to stress, including weather and disease.

4

Microbes balance the soil ecosystem, building soil health.
